

The following guidance is based on all SIM slots which are transverse to the battery, such as BlackBerry Z10 / Q10, Galaxy S5 mini etc. The PINs of the SIM cards should be disabled for the Q10 / Z10 / Z30 before the installation! Instead, activate a device lock.

Please select iPhone 4S off for BlackBerrys in the Setup of the Dual SIM settings! (No "\*" asterisk means, it is deactivated)

1/2. Insert Dual SIM Card into the SIM slot without a SIM card to the max!

3. Insert the Micro-SIM card into the Micro SIM slot.

4. Assemble the external SIM Card. Push it into the designated metal rail.

5/6/7. Run the adapter over the battery and fold it at a 90 ° angle parallel to the battery, as centrally as possible to the total width of the mobile phone. Depending on the location of the SIM slots usually for the longer side!

8. Finished!

9. Please go to applications-> Dual SIM, SMS services etc. (SIM card symbol with superscripted gear wheel).
